

Press release – Düsseldorf (29 August 2025)

The central platform for renewable energy in North Rhine-Westphalia

Solar Solutions Düsseldorf will once again establish itself in 2025 as the leading platform for professionals in the fields of Solar, Smart Storage, EV Charging and Green HVAC in North Rhine-Westphalia. On Wednesday 3 December and Thursday 4 December 2025, Messe Düsseldorf will open its doors exclusively for the industry.

The exhibition continues to grow. More than 250 exhibitors will present their companies across an extended area of 27,050 square meters, spread over two halls. This expansion underlines both the demand within the industry and the importance of providing the right stage for the latest developments, products and services. At the heart of the exhibition are current industry trends, direct business opportunities and personal networking.

The future of the industry under one roof

Solar Solutions Düsseldorf reflects the full breadth of the industry, bringing together solutions from photovoltaics and storage to electric mobility and green building technologies. The clear concept of the exhibition is reflected in the carefully selected exhibitors, the innovations on display and an extensive seminar program.

In 2025, the seminars will be curated and moderated by Heiko Schwarzbürger, industry expert and editor-in-chief of the trade magazine photovoltaik. He will bring leading voices and key figures of the industry onto the stage and ensure that the most pressing topics with direct relevance to the market are highlighted. Visitors will benefit from a well-structured program that addresses both strategic questions and practical solutions, providing valuable impulses for daily business.

An international concept with a regional focus

Solar Solutions Düsseldorf is part of the international Solar Solutions International exhibition series, which also includes the well-established Solar Solutions Amsterdam that has been running for more than twelve years. The concept has successfully expanded across Europe: since 2022 in Düsseldorf, since 2023 in Kortrijk (Belgium), since

2024 in Bremen and from 2025 also in Turin (Italy). In 2026 Vienna will join as a new location.

“Our concept differs clearly from traditional international exhibitions,” explains Peter Groot, Managing Director of Solar Solutions International. “We focus entirely on business, present only end products and connect international top companies with a carefully selected regional target group.”

This makes the exhibition an important bridge between international innovation and the concrete needs of regional markets.

Direct business at the core

Solar Solutions Düsseldorf follows a clear mission. It aims to strengthen regions with high potential for the solar industry and to offer trade partners a central platform. For exhibitors, this means access to a highly relevant audience. For visitors, it offers the opportunity to gain a complete market overview in just one day.

International manufacturers, distributors and wholesalers will meet installers, planners, energy consultants and other sustainability professionals from North Rhine-Westphalia. The program is complemented by free expert seminars that present practical solutions and strategies. In this way, the exhibition combines business opportunities with concrete knowledge transfer.

Strong industry partnerships

Another success factor is the close cooperation with the regional renewable energy associations. Each German edition of the exhibition is organized in collaboration with the respective associations, including LEE NRW, LEE Niedersachsen/Bremen and LEE Sachsen. These partnerships ensure that regional issues are directly addressed and that visitors benefit from additional value.

Ticket registration now open

Solar Solutions Düsseldorf 2025 will take place on Wednesday 3 December and Thursday 4 December 2025 in halls 13 and 14 of Messe Düsseldorf. Access to the exhibition is reserved exclusively for professionals from the renewable energy sector.

With an invitation code from an exhibitor, an industry partner or a media partner, tickets are free of charge. Without a code, tickets cost €75 excluding VAT per person. Further information on ticket sales and participation options can be found at:
